

ARDEX PC COLOR-DYE™

Waterborne Dye for ARDEX PC-T™ Polished Concrete Topping

ARDEX PC COLOR-DYE™ is a waterborne dye designed for use in the ARDEX Polished Concrete System (APCS). When applied to ARDEX PC-T™ Polished Concrete Topping, it will provide a unique coloring effect, ready for sealing. ARDEX PC COLOR-DYE deeply penetrates the surface of the ARDEX PC-T, providing a unique and colorful alternative to the finishes typically found with standard polished concrete. PC COLOR-DYE is low VOC and is safe to use on any project. ARDEX PC COLOR-DYE is manufactured as a concentrate that is diluted with water and is available in 8 colors. For use in interior applications only.

1 Gold

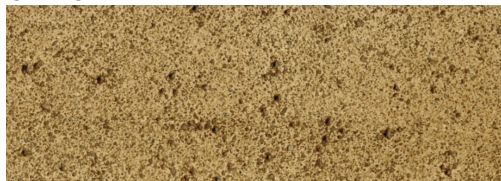

5 Light Brown

2 Tan

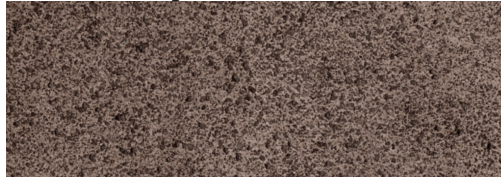

6 Brown

3 Nutmeg

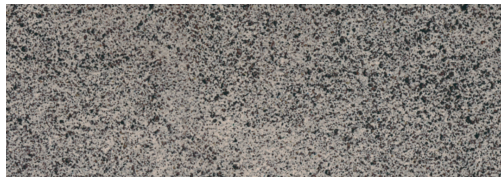

7 Dark Gray

4 Red Brown

8 Black

Color examples created using ARDEX PC-T™ White

ARDEX PC-T™ Light Gray

(Standard ARDEX color - No PC COLOR-DYE used)

ARDEX PC-T™ Gray

(Standard ARDEX color - No PC COLOR-DYE used)

Due to variations in printing processes, colors are approximate. Jobsite product samples are recommended.
